WELCOME

Thank you for working with Stealth Belt to enhance the quality of your ostomy patients' lives. The Stealth Belt conceals, supports and protects the ostomy appliance while providing 24-hour support. It is recommended to order at least 2 belts, one to wash - one to wear.

Stealth Belt has partnered with Melling LLC dba Melling Medical to quote and process purchase orders. Please use this guide to find the appropriate products and SKUs for your patient before placing an order.

Additional Stealth Belt related questions regarding products, sizes, recommendations should be directed to

va@stealthbelt.com
800-237-4491 ext 82.

Prosthetics: All detailed quote requests can be sent to
quotes@mellingmedical.com.

Orders can be placed with Melling Medical by phone or fax:

Phone: (844) 635-5464
Fax: (703) 373-9584

PRODUCTS

PRO

The Stealth Belt Pro is our most popular belt. It holds the ostomy appliance toward the hip in order to keep it discreet and out of the way of the pant line. It has an adjustable closure that gives 4" of adjustability (i.e. a 30" belt can be fit between 28"-32").

Please read the product description at www.stealthbelt.com for more details.

PRODUCTS

The Slip-On Stealth Belt is the lowest profile option. There is no adjustable closure for the waist size of the Slip-On. When putting this belt on, the patient would step into the band and pull the belt up around the waist. It is made primarily for casual wear, sleeping, or under tight-fitting clothing. For body size measurements that are between even sizes, we recommend going up to the nearest even size.

Please read the product description at www.stealthbelt.com for more details.

PRODUCTS

NEOPRENE

The Neoprene Stealth Belt is specifically for water activities. The other belt styles that we have can be used in the water, but if the patient is interested in swimming laps, going into the ocean, doing water sports, or wants the maximum level of support in the water, this is the best option available. Neoprene Stealth Belts have 4" of adjustability.

Please read the product description at www.stealthbelt.com for more details.

PRODUCTS

VERTICAL

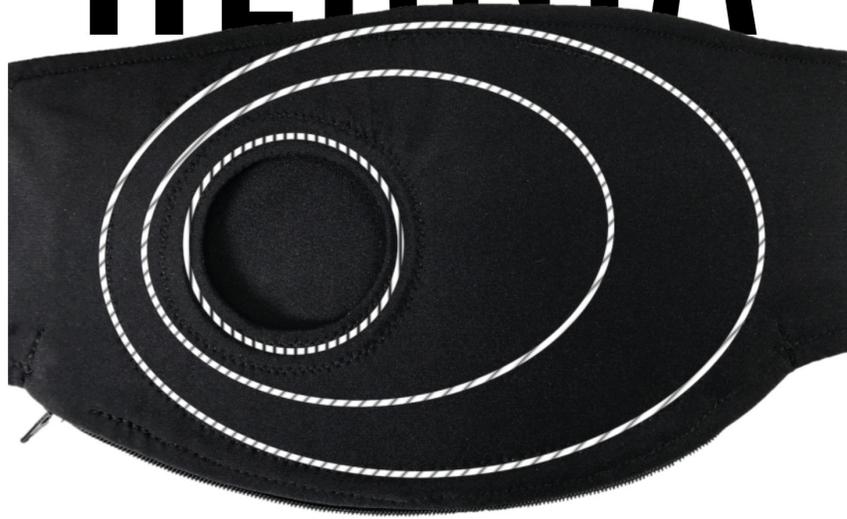

The Stealth Belts may be modified to hold the ostomy appliance vertically (straight down). Belts made in a vertical orientation may be preferred by those with urostomies (as opposed to colostomies or ileostomies), or those who simply prefer to wear their appliance vertically. Please reference the “Building a SKU” section for ordering details.

Please read the product description at www.stealthbelt.com for more details.

PRODUCTS

HERNIA

The Stealth Belt Pro may be modified to include additional hernia support for those who have developed a hernia. The hernia support modification is available in either the standard horizontal orientation or in the vertical orientation. Please reference the “Building a SKU” section for ordering details.

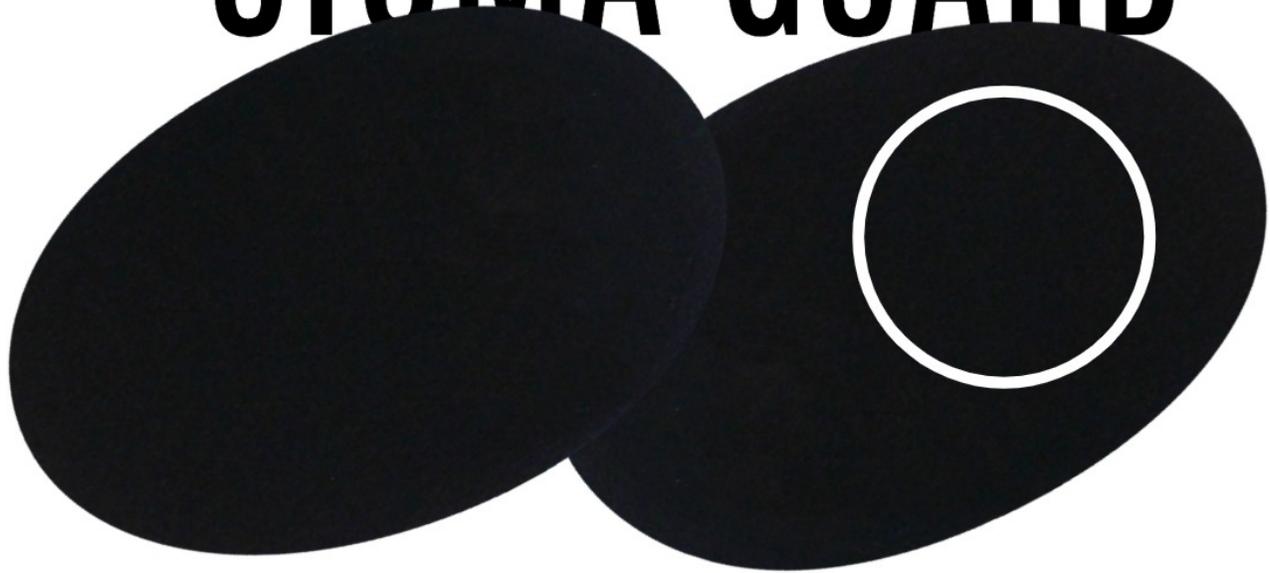

Please read the product description at www.stealthbelt.com for more details.

PRODUCTS

MUFFLER /

STOMA GUARD

The Muffler is a neoprene insert that may be used with any Stealth Belt to help reduce noise from the Stoma.

The Stoma Guard is a protective piece of plastic sewn into the inside of a neoprene insert that can be used to help guard the stoma from impact and muffle unwanted noise.

Mufflers and Stoma Guards require a Stealth Belt for use

Please read the product description at
www.stealthbelt.com for more details.

MUFFLER & STOMA GUARD SKUs

MUFFLER / STOMA GUARD

Mufflers and Stoma Guards are accessories for Stealth Belts. They are not able to be used as independent products, and must have a Stealth Belt to function as advertised.

The SKU for a Muffler is: **MUFF**

The SKU for a Stoma Guard is: **SG**

Pricing information may be found on the Stealth Belt price list with the associated SKU.

Please read the product description at www.stealthbelt.com for more product details.

HOW TO MEASURE

1. Measure the body size

Measure around the body, above and below the stoma.
Average the two measurements.

*Please do not use pant size measurements for body size

*Please select the nearest even number measurement for body size (e.g. 33" measurement should get either a 32" or 34" Stealth Belt, as they have a 4" Inch adjustable range).

2. Indicate which side of the body the stoma is on.

3. Measure the flange diameter

- Fold sides in toward center
- Measure diameter, where the pouch meets the wafer

- Separate the two pieces
- Measure raised plastic ring

*For flange measurements that are between 2 sizes, please round up to the nearest available flange size. For Flange sizes in excess of 3 1/4", please contact Melling Medical for a custom quote.

For additional help procuring measurements, please contact Stealth Belt, Inc.

BUILDING A SKU

STYLE

Stealth Belt Offers three ostomy support belt styles

PR Pro

BD Slip-On

NE Neoprene

WAIST SIZE

All Stealth Belts are available in 2" increments from size 26 - 56

26	28	30	32	34	36	38	40
42	44	46	48	50	52	54	56

Call for custom SKU for body sizes over 56"

BODY SIDE

All Stealth Belts are available in left and right, dependent on the patients stoma location

LT Left

RT Right

Call for custom SKU for double ostomy

FLANGE SIZE

Stealth Belt offers four flange sizes. If flange size is not listed, choose the next largest size

134 1 3/4"	214 2 1/4"	234 2 3/4"	314 3 1/4"
-------------------	-------------------	-------------------	-------------------

Call for custom SKU for flanges over 3 1/4"

COLOR

All Stealth Belts come standard in black

BLK Black

EXAMPLE: Patient is a size 34 waist. Their Stoma is located on the right and they use a 2 1/4" appliance.

PR **34** **RT** **214** **BLK**

BUILDING A SKU

VERTICAL MODIFICATION

The Stealth Belt Pro and the Neoprene Stealth Belt may be modified to hold the appliance vertically, as shown on page 7. To build the SKU for a product with a Vertical Modification, the abbreviation “-VR” can be added at the end of the SKU.

EXAMPLES:

Pro with Vertical Modification SKU:

PR **34** **RT** **214** **BLK** **-VR** **VERTICAL** PR34RT214BLK-VR

Neoprene with Vertical Modification SKU:

NE **34** **RT** **214** **BLK** **-VR** **VERTICAL** NE34RT214BLK-VR

ADDED HERNIA SUPPORT

Additional Hernia Support may be added to the Stealth Belt Pro or to a Vertical Stealth Belt Pro. Reference page 8 for Hernia Support details. To build the SKU for a Stealth Belt Pro with additional Hernia Support, the abbreviation “-PH” or “-VRPH” may be added to the end of the SKU.

EXAMPLES:

Pro with added Hernia Support SKU:

PR **34** **RT** **214** **BLK** **-PH** **HERNIA** PR34RT214BLK-PH

Vertical Pro with added Hernia Support SKU:

PR **34** **RT** **214** **BLK** **-VR** **VERTICAL** **PH** **HERNIA** PR34RT214BLK-VRPH

FAQs

Questions

Answers

What happens if a patient's body measurement is between two sizes?

If a patient has a body size that is between 2 available sizes, the belt ordered should use the nearest available even number body size. (e.g. a 33" body measurement should use either a 32" or 34" Stealth Belt).

To determine whether to go up or down, the patient should consider if they expect to gain or lose weight in the near future, or if they plan to use the belt to be physically active. Active use generally prefer a tighter fit. Most Stealth Belts have a 4" inch adjustable range, so generally either size will work for those who measure in between.

The same applies for flange measurements. If an appliance is measured between two sizes, the next largest size flange option will work best (e.g. a 2 1/2" flange should get a 2 3/4" Stealth Belt measurement).

I don't see a SKU for the product that my patient needs - what should I do?

Most needs will be met by the SKUs available, but for unusual circumstances such as extra large sizes or double ostomies, please contact Melling Medical directly for a price quote and custom SKU before placing an order.

Which patients should get Stealth Belts?

Stealth Belts are helpful for any patient that has an ostomy. They can be used for colostomies, ileostomies, and urostomies. Stealth Belts are suitable for any activity and can be used 24/7.

FAQs

Questions

Answers

What are the benefits of a Stealth Belt for the patients?

Stealth Belt's can help reduce the chance of leaks and Irritation by supporting the weight of the appliance as It fills. They also help patients Improve their overall quality of life by providing a sense of security and discretion, concealing the appliance and Improving confidence.

How many Stealth Belts should each patient have?

We always recommend that a patient have at least two Stealth Belts - one to wash and one to wear. For many patients, It Is most advantageous to have multiple style belts to use for different activities.

Example: Each ostomy patient would have a Stealth Belt Pro for daily use, a Slip-On Stealth Belt for night-time use, and a Neoprene Stealth Belt for use In the water.

How often should Stealth Belts be replaced?

The lifespan of the Stealth Belt product Is dependent on how much It Is used and how often It Is washed. We have found that It Is generally best to replace Stealth Belts every 6-8 months.

TESTIMONIALS

Stealth Belt is committed to providing top notch products and service that patients with ostomies can depend on - especially our Veterans. We get hundreds of reviews from people who have used Stealth Belt products to get back to living comfortable and more fulfilling lives after surgery. Here are a few of our favorites from Veterans:

"I'm retired Navy, 8 year permanent ostomate and proud Stealth Belt ambassador. In my opinion, their impeccable line of products are among the highest quality of standards in the industry. Wearing Stealth Belt products allows me to comfortably and confidently Go Anywhere Do Anything."

- Daniel S.

"I am always excited to tell people about how great and life-changing the Stealth Belt has been for me, both mentally and physically. For everyday activities including going to Church, I feel totally secure and when I put on my suit and nobody can tell I have an ostomy. The quality is great and the Customer Service is exceptional."

- Chris R.

"While serving in the Army I became sick needing emergency surgery and an ostomy. I struggled with how I would move on, till I found the Stealth Belt. This made my last two years in the Army possible and wearing my uniform until I was retired from my condition. Without the Stealth Belt, I would not have been able to finish with dignity."

- Donovan L.
